

The Litchfield area is located approximately 110 kilometres south of Darwin and is part of the Litchfield pegmatite belt which is a 180 km long belt of pegmatites located along the western margin of the Pine Creek Orogen.

Monax has signed a binding term-sheet with the owner of three Exploration Licences in the Litchfield area, and initial rock chip results for samples collected within the project area report high-grade lithium up to 7.55%  $\text{Li}_2\text{O}$  and lepidolite-rich rocks up to 2.39%  $\text{Li}_2\text{O}$ .
